CARPENTER CENTER FOR THE VISUAL ARTS

**Le Corbusier** (born Charles-Edouard Jeanneret, 1887–1965) is an icon of the Modernist movement in architecture. His buildings and theories have influenced modern architecture the world over. Now you can create 10 of his most important works using the art of kirigami (cutting and folding).

Each project features step-by-step instructions and a template that you can remove from the book. Follow the lines on the template, cutting and folding to make your own model. All you need is a scalpel, a cutting mat and a ruler. Clear cutting tips are provided and photos of the finished model show you the final design. When you are done, simply display your finished model and admire your handiwork. *Le Corbusier Paper Models* is a must for Corb fans, Modernists and architectural model enthusiasts.

**Marc Hagan-Guirey** is a kirigami paper artist and design director. His kirigami commissions for both private and commercial clients include pieces for the National Theatre, London Transport Museum and Samsung Galaxy. He is the author of *Paper Dandy's Horrognani* (2015) and *Frank Lloyd Wright Paper Models* (2017; both Laurence King) and *Star Wars Kirigami* (2017).
